

Irizar: A brand focused on integral products

Kortrijk, 16 October 2015

Irizar is attending the international Bus and Coach exhibition, Busworld 2015 with the complete range of coaches and buses. For the first time, all the coaches and buses exhibited at this exhibition are integral and are equipped with the latest technological advances developed by the Group as far as safety, efficiency, energy storage, charging, fleet management and entertainment are concerned.

In addition to the two units of the new model presented model Irizar i8, the stand is also exhibiting the Irizar i6 and the Group's 100% electric city bus, the Irizar i2e.

An Irizar i4 is on show at the main entrance to the exhibition site along with another novelty, the new Irizar i3le, the first low-entry integral bus which is presented, on this occasion, with a DAF Biodiesel engine aimed at the European intercity sector.

With this vehicle, Irizar consolidates its position in the luxury coach-manufacturing world with an expression of the artistic and technological spirit of a brand, focused on spectacular designs, technology and sustainability. At the same time, it offers prestige to the new owners and exceptional comfort to the driver, courier and passengers, guaranteeing an unforgettable stimulating experience.

What's more, Irizar is also presenting a new generation of seats, a new interior trimming collection and a new interior configurator.
