

Ormaiztegi the 12th June 2013

DELIVERY OF THE 1000TH IRIZAR i6 COACH

Irizar delivers the 1000th Irizar i6 coach

The 1000th Irizar i6 manufactured at the Irizar plant in Ormaiztegi (Spain) was delivered at an event hosted in the Irizar facility

The Irizar i6 was presented to the market at the International Bus and Coach Fair (FIAA in Spanish) that took place in Madrid in November 2010. Two years later, we are happy to confirm that the coach has received a warm welcome from the customers in the various markets where it is sold, as proven by this information.

The 1000th unit is in addition to the more than 800 units sold at other Irizar production plants since last year, the Irizar i6 reached Australia, Brazil, South American countries, South Africa and Mexico.

The official Australian presentation took place in July 2012 in Melbourne with prototypes of the 13.4 metre and 14.5 metre versions that complied with demanding Australian ADR homologation norms.

The Australia presentation was followed by South Africa. The event, which took place this past 29 August in the city of Centurion, included two 14 metre units that had been imported directly from Brazil.

The product's adaptation to the specifications of Brazil and other South American countries has also required strong efforts. The official presentation took place as part of the Expoonibus Fair, which took place on 3-5 October at Rio de Janeiro's Riocentro Convention Centre, where four different versions of the new Irizar i6 coach were displayed.

In the case of Mexico, the official launch of the new i6 took place on 8 November at the Polyforum Siqueiros in Mexico City, where executives from the most important passenger transport and tourism companies also attended.

The Irizar i6 is currently manufactured as an integral coach as well as for all the chassis brands available on the market. It is highly versatile due to the different configurations that are offered, with lengths ranging from 10.7 m to 15 m, three widths from 2.5m to 2.6m, and two heights of 3.5m and 3.7m. There are also a wide variety of options that adapt to the most demanding customer and market requirements.

The Irizar i6 is a versatile high-end coach that is ideal for commuter and touring services. It stands out because of its features, design, aerodynamics, careful details and comfort. In summary, it is a state-of-the-art, safe, reliable and profitable coach.
