

## ***Delivery of the Irizar i6 number 2000 to Grupo Ruiz of Madrid***

*In Madrid on 29<sup>th</sup> January 2015*

***During an event held in the installations of Empresa Ruiz, belonging to Grupo Ruiz of Madrid, Irizar delivered unit number 2000 of its i6 coach model manufactured in its facility in Ormaiztegi.***

*The Irizar i6 number 2000 forms part of a batch of 5 units delivered to E. Ruiz built on the Scania 410 EB 4x2 chassis, three of which are Irizar i6 12/35 (12.20 metres long and 3.50 metres high) and two i6 13/35 (13 metres long and 3.50 metres high) The coaches are equipped with 55 reclining seats, plugs and USB ports for passengers, frontal destination sign and extra tinted double-glazing with a luminary transmission rate below 7%.*

*These vehicles add to the Grupo Ruiz fleet, elevating the amount of units manufactured by Irizar, between the Pb and i6, with the ones Grupo Ruiz already has, to 69, which shows the close relationship that both companies have had since they started to regularly collaborate in 2000. Circumstantially Grupo Ruiz also received unit number 3000 of the Irizar Pb model in the year 2006.*

*This i6 unit 2000 adds to the more than 2000 i6 units sold in the rest of the Irizar production plants in Australia, Brazil, Latin America, South Africa, and Mexico where the Irizar i6 arrived in 2012.*

*Since its presentation over 4 years ago, the i6 model from Irizar has been consolidated as a reference in the regular and private service transport. That way, the Irizar i6 has become a synonym of quality, safety, reliability and profitability, standing out above the other alternatives in the premium market of passenger service. It consolidates the strategy of strengthening the Irizar brand by means of investments made in improving quality and productivity in all its production plants.*

*Empresa Ruiz forms part of Grupo Ruiz, one of the main passenger transport groups on a national level, with presence in different cities around Spain and Morocco. Grupo Ruiz manages several administrative concessions for urban and interurban transports, offers private services, and tourist visits, manages hotel and catering activities, car parks, renting of vehicles with or without driver, road and house cleaning services, industrial and tourism workshops and has great vocation for diversification which has led it to become an international holding with more than 1,900 employees working for millions of clients in Spain and abroad.*
