

## RENCONTRES DE TRANSPORTS PUBLICS 2017 Marseille, 10-12 October

### Debut presentation of the new range of zero emissions buses with Irizar e-mobility technology and branding

Irizar, a world leader in the manufacture of buses and coaches, is attending this year's Rencontres de Transports Publics, held in Marseille from 10 to 12 October, with a 300 m2 stand where it will be presenting the future strategy of the recently created Irizar e-mobility and its new range of 100% electric zero emissions buses.

Irizar e-mobility combines the knowledge and experience of all the Group's companies to create comprehensive urban transport solutions consisting of 100% electric buses and the main infrastructure systems required for charging, drive systems and energy storage. All these systems have been designed and manufactured using European technology 100% from the Group and have the Irizar guarantee and quality of service.

The range of products exhibited includes the **Irizar ie bus** (Irizar electric bus), a 12 metre urban bus, and the **Irizar ie tram** (Irizar electric tram), an 18 metre tram version articulated bus, which are both 100% electric zero emissions vehicles. Additionally, Irizar is making the world premiere presentation of its pantograph charging system.

The **Irizar ie bus** is a 12 metre long class I electric bus with double doors and an interior layout with capacity for 29 seated passengers, 47 standing passengers and two PRM spaces.

The **Irizar ie tram** is the first 100% electric articulated bus that the Irizar Group is officially presenting on the market. The unit is 18.73 metres long, has 4 access doors and capacity for 155 passengers, 1 PRM and 1 pram.

This Irizar e-mobility bus, closer in concept to a tram, has an innovative, modern, elegant and aerodynamic design and is emerging as a new flexible and sustainable mobility solution that can be seamlessly integrated into any infrastructure or city in the world to provide modern design, safe, efficient transport and luxury comfort.

This high-capacity integral vehicle developed entirely by the Group is set to lead the market thanks to its efficiency, safety and reliability.

Additionally, the Irizar pantograph quick charging system, which has been developed using entirely in-house technology, will be presented.

The Irizar Group aims to promote the use of clean and accessible transport that shows commitment to the environment and people's well-being and health to create better urban environments. It is committed to reducing noise pollution, achieving low fuel consumption to lower costs and to zero emissions vehicles.

This is how Irizar is showing its future strategic lines and its firm commitment to its customers and society, to whom it provides high added value through its products and services, without overlooking such fundamental qualities as design, personalisation, safety, reliability and sustainability.

These innovative products will be presented for the FIRST TIME in FRANCE at Irizar e-mobility stand 41 on the 10th at 12:00 pm.
